Why the Orators Camp

Speaking up is a skill, and skills can be practised. Around 2 in 10 people would do almost anything to avoid speaking in public. We start young, so speaking up feels normal long before it matters for exams, interviews and leadership.

DAY 1

Public speaking

Voice, posture and structure. Students plan short speeches, deliver them on the clock and get specific feedback.

DAY 2

Critical thinking

Building arguments, weighing evidence and spotting weak reasoning, including their own.

DAY 3

Debate

Taking a side, rebutting with respect and disagreeing well, in real practice debates with a motion and a timer.

How we teach

No long lectures. Every session is built around students standing up, speaking and trying again, in a friendly, non-competitive room. Students practise through **simulations** of real speaking situations and **short, timed rounds** of preparation and speeches, in breakout squads of 6–7, each with their own coach. KL Debate has prepared a **curated syllabus** designed to help every student become a better speaker, and each student receives KL Debate's **complete workbook** to support a long-term learning journey.
